

1a the mastery you follow	1b. The track of specialisation you follow	final judgement	27. What were the best aspects of this semester?	28. What aspects of this semester were most in need of improving?
HMI	7			
HMI	HCID EIT	9	kick in event and a lot good courses	printing and login to lab computers, it is really frustrating to set everything up
HMI		6		
HMI		8	HMI Project	
HMI	Human comp	7		
HMI		10	I only did an internship this semester in Iceland. Which is a great experience, not only from a educative perspective.	Not much. Again, internship.
HMI		7		
HMI		8	Freedom in courses, nice courses	Last quartile some courses without a lot of structure (Media Technologie, 2nd half Information Retrieval)
HMI		8	I am happy with the responsiveness and help of PhD students and professors in our group.	I think if we have specific place for HMI Master students to work together. For example, in the RAM group in our university, there are some desks with computers and Master student can work there. It is good idea because Master student will have more chance to meet each other and they can help each other even though they are not in the same course or team and they could have more socializing such as drinking coffee and going to lunch together. Also, just by reading the website, it is not so easy to understand which PhD student works with which professor in the group.
