

Summary of the evaluation of Create Module 7: Innovation and Entrepreneurship.

Module Coördinator: Gerrit van der Hoeven

Available material: SEQ questionnaire and two CREEC evaluations.

The overall conclusions are:

1. Module scores very low (“red light”) on every indicator except on Challenging, Prior Knowledge, Time-table (Changes and information), Collaboration, Project and Enough time for Assessments.
2. Average overall score of the module: 1.5.
3. Workload: experienced workload <40 hours/week for 85% of the students. So experienced workload is quite low.
4. Once again Information, Organization and Communication is a problem, the famous *IOC* problem of Create.

Overall the evaluation can be summarized in: The idea behind the module is good and appreciated but the actual implementation should be improved, especially the business courses.

Positive points

1. Acting Responsibly
2. Strategies
3. Business Game, but students had the experienced that they not learn that much.

Negative points

1. Innovation & Entrepreneurship:
 - a. Communication is bad.
 - b. Teacher do not show up.
 - c. Change of study material **two** days before test.
 - d. Very unclear what is expected from the project.
 - e. Inconsistent grading between teachers.
 - f. Assignments unclear.
 - g. Organization: postponement of resit!

Advice of the OLC

1. Strengthen the Create module team.

2. Re-implement Innovation & Entrepreneurship
