

## **EVERY CHILD ENJOYS THE SAME LEVEL OF EDUCATION: QUALITY= EQUAL**

In 8 years, we'll have implemented the Finnish education system. With that information and those practices, we'll see a class have a lesson in a public park with a passionate teacher. A teacher with respect for every child and every child having respect for the other. The parents of these children are proud that their children interact with everyone, no matter their background. The inequality gets reduced this way. That's what belongs in a just society.
