

INNER ANTENNA

It is the year 2130. I am an 8-year-old girl, and I am at school. Today, our class is about making contact with our intuition. We want to learn how to use our inner antenna in a good way. We do this together, in the classroom. We first practice. Everyone is born with their own vibration. With our antennas we receive our own and those of others. Everyone is equal here. We complement and strengthen each other. The goal is to pass and get our wisdom diploma. I like this class because I feel very happy and at peace afterwards. This is how we will spread love all over the world.
