

MEN AND WOMEN SHOULD BE EQUAL!

One day in 2050, there were two girls named Rosalie and Amelie. In daily life, Rosalie is very relaxed. Amelie is always busy and enthusiastic. One day, the girls were in a public park. They saw a lot of inequality between men and women. They wanted to change this immediately, so the next day they went to do a challenge for boys and girls, where they all ended up with the same score. Men and women have different values, but that does not mean one is better than the other.
