

THE BEAUTY OF NATURE

It is the year 2030. My home is the museum of nature. Everyone is welcome in this museum. The museum is not just a place to observe the beauty of nature but to also create. In this museum you can buy your own display and create your own mini nature area. The owner can do anything with it, plant food, flowers, or experiment with it. All the areas are connected with WIFI cameras so the owner can check the progress of their nature stand. To buy a stand or visit the museum, people must pay. As there is no poverty in this world, this is not a problem for anyone.
