Bachelor disciplines eligible for admission into the Master's programme Geo-information Science and Earth Observation

All applications made through studielink, also those from backgrounds not listed here, will be assessed individually, based on transcripts of records, a motivation letter and a CV.

Disciplines:	Geo-information Science and Earth Observation
agriculture	*Admission dependent on course subjects and CV **
architecture	*Admission dependent on course subjects and CV*
cartography	Direct admission possible *
chemistry	*Admission dependent on course subjects and CV*
civil engineering	Direct admission possible
computer science	Direct admission possible
data science	Direct admission possible
earth sciences	Direct admission possible
ecology/biology	*Admission dependent on course subjects and CV*
environmental science	Direct admission possible
environmental/land use planning	Direct admission possible
environmental/natural resources management	Direct admission possible
forestry	Direct admission possible
geo-engineering	Direct admission possible
geographical information systems	Direct admission possible
geography	Direct admission possible
geo-informatics	Direct admission possible
geology	Direct admission possible
human geography	Direct admission possible
hydrology	Direct admission possible
informatics	Direct admission possible
land administration and management	Direct admission possible
land economics	*Admission dependent on course subjects and CV*
land information	Direct admission possible
land law	*Admission dependent on course subjects and CV*
mathematics	Direct admission possible
(agro-)meteorology	Direct admission possible
physical geography	Direct admission possible
surveying	Direct admission possible
transport and infrastructure engineering	Direct admission possible
urban and regional planning	Direct admission possible

*"Direct admission possible": this means your undergraduate discipline is sufficiently connected to our master's programme and, if you fulfil the other admission criteria of the University of Twente, you can be admitted into the programme.

***"Admission dependent on course subjects and CV":* For some disciplines mentioned in this list, direct admission could be possible, but all evidence of prior education and work experience will have to be assessed first (submitted through studielink). If insufficient matching courses or experience is found, a premaster will be required to become eligible for admission.
