

TEACHING AND EXAMINATION REGULATIONS

MASTER'S DEGREE PROGRAMMES EEMCS

A. FACULTY SECTION

B. PROGRAMME-SPECIFIC SECTION

2017-2018 academic year

Introduction to the Teaching and Examination Regulations for Master's degree programmes at the Faculty of Electrical Engineering, Mathematics and Computer Science.

General

The Dutch Higher Education and Research Act (*Wet op het hoger onderwijs en wetenschappelijk onderzoek*, WHW) of 1993 requires a broad outline of the teaching programme and examining for each degree programme to be recorded in the Teaching and Examination Regulations (TER (Dutch: OER)).

In accordance with Section 7.13, Paragraph 1, of the WHW, the TER must contain sufficient and clear information about the degree programme or group of programmes to which they apply. Section 7.13, Paragraph 2, of the WHW lists those issues that must, as a minimum, be stipulated in the TER with respect to procedures, rights and responsibilities relating to the teaching and examinations that are part of each degree programme or group of programmes. The WHW also includes a number of separate obligations relating to the inclusion of rules within the TER.

The model TER is subdivided into two sections (Section A and Section B), which together form the TER. Section A, which can be seen as the faculty section, includes provisions that may apply to several degree programmes. Section B contains the provisions that are specific to the particular degree programme.

SECTION A: FACULTY SECTION

1. General provisions

Article 1.1 Applicability of the Regulations

1. These Regulations apply to teaching and examinations for the following Master's degree programmes: Applied Mathematics, Business Information Technology, Computer Science, Electrical Engineering, Embedded Systems, Human Media Interaction, Internet Science and Technology, Systems & Control (hereinafter referred to as: the Master's programmes) provided by the Faculty of Electrical Engineering, Mathematics and Computer Science (hereinafter referred to as: the faculty or EEMCS) of the University of Twente.
2. These Regulations consist of a faculty Section (Section A) and a programme-specific Section (Section B). Section A contains general provisions that apply to teaching and examinations for all the Master's programmes at EEMCS. Section B contains programme-specific provisions. Together, Sections A and B form the Teaching and Examination Regulations for the relevant programme.
3. The Regulations also apply *mutatis mutandis* to the joint Master's degree programmes and study units provided by the faculty, pursuant to Section 7.3c of the WHW.
4. These Regulations apply to anyone enrolled in the Master's programmes, irrespective of the academic year in which the student first enrolled in the programme.
5. Section B of these Teaching and Examination Regulations may include additional general provisions for the relevant programme.
6. The general provisions and the programme-specific provisions to the Teaching and Examination Regulations have been authorized by the Dean.
7. The Examination Board sets down rules with regard to the execution of its tasks and powers in accordance with Section 7.12b of the WHW. These regulations are specified in the Rules and Regulations of the Examination Board.

Article 1.2 Definitions

The following definitions are used in these Regulations:

- a. **Academic year:** the period beginning on 1 September and ending on 31 August of the following calendar year;
- b. **Admission Board:** the committee that assesses, on behalf of the Dean, whether a candidate meets the requirements for admission to the Master's programme of his/her choice. If no Admissions Board has been appointed for the programme, the Programme Board will function as the Admissions Board;
- c. **Bridging programme or pre-Master's programme:** a programme that can be offered to students who cannot yet be admitted to the Master's programme due to insufficient knowledge, understanding or skills, in accordance with Article 7.30 of the WHW;
- d. **Course catalogue:** the guide for the Master's programme concerned that provides further details of courses and other information specific to the programme. The course catalogue is available digitally at www.utwente.nl/coursecatalogue;
- e. **Course:** a study unit of the programme, as defined by the WHW;
- f. **Dean:** head of the faculty;

- g. Disability:** any condition which is (at least for the period in question) chronic or long-term in nature and which constitutes an on-going disadvantage for the affected student when receiving education, taking (interim) examinations or taking part in practical exercises;
- h. Double degree:** two degrees awarded by two institutions of higher education that offer a joint programme; both degrees demonstrate the successful completion of this programme;
- i. EC:** European Credit. A unit involving 28 hours of study, as used in relation to the European Credit Transfer System (ECTS), whereby a full academic year consists of 60 ECs or 1,680 hours (Article 7.4 WHW);
- j. Examination Board:** sometimes referred to as the Board of Examiners. The Examination Board is the body that establishes, in an objective and expert manner, whether a student meets the criteria set out in the Teaching and Examination Regulations regarding the knowledge, insight and skills required in order to obtain a degree from the programme concerned;
- k. Examiner:** the individual who has been appointed by the Examination Board, in accordance with Article 7.12c of the WHW, to hold examinations and tests and to determine their results;
- l. Executive Board:** Executive Board of the University of Twente;
- m. Final examination (*examen*):** a degree programme concludes with a final examination. A final examination is deemed to have been completed successfully if the study units associated with the relevant programme have been achieved. The examination may also include an additional assessment by the Examination Board;
- n. Fraud and plagiarism:** fraud is an act or omission by a student designed to partly or wholly hinder the accurate assessment of his/her own knowledge, understanding and skills, or those of another person. Fraud includes plagiarism, which is the use of someone else's work without including a correct reference to the source. See the Student Charter of the UT for further details.
- o. Homologation:** a programme that can be offered to students who can be admitted to the Master's programme but who nevertheless have insufficient knowledge, understanding or skills, according to Article 7.30 of the WHW;
- p. Interim examination (*tentamen*)** an assessment of the student's knowledge, understanding and skills relating to a course component. The assessment is expressed in terms of a final grade. An interim examination may consist of one or more tests (*deeltentamens*);
- q. Joint degree:** a degree awarded by an institution together with one or more institutions in the Netherlands or abroad, after the student has completed a degree programme (a degree programme, a major or a specific curriculum within a degree programme) for which the collaborating institutions are jointly responsible;
- r. Learning Management System (LMS):** Blackboard
- s. Master's programme or programme:** the Master's degree programme, as referenced in Article 7.3a Paragraph 1 subparagraph b of the Act: the entirety of the course components, teaching activities/methods, contact hours, testing and examination methods and recommended literature;
- t. Master's thesis project / final project:** a component comprising literature research and/or a contribution to scientific research, which always results in a written report;
- u. Practical exercise:** participation in a practical training or other educational learning activity, aimed at acquiring certain (academic) skills. Examples of practical exercises are:
- researching and writing a thesis;
 - carrying out a research assignment;
 - taking part in fieldwork or an excursion;
 - taking part in another educational learning activity aimed at acquiring specific skills or participating in and completing a work placement.
- v. Programme Board:** the committee charged by the Dean with managing the programme;

- w. **Programme Committee:** the Programme Committee as referred to in Article 10.3c WHW;
- x. **Quarter or quartile:** a part of a semester as specified in the academic calendar (*jaarcirkel*) of the university;
- y. **Student Information System (SIS):** the system used by the institutional administration to register and record information relating to particular students and study data, as stipulated in the WHW, in this case Osiris;
- z. **Student:** any person enrolled for a programme in accordance with Articles 7.34 and 7.37 of the WHW;
- aa. **Study Adviser:** staff member appointed by the Dean of the Faculty to act as an intermediary between the student and the programme and, in this capacity, to represent the interests of the students and provide advice to the students;
- bb. **Study load:** the study load associated with a study unit to which an interim examination applies, expressed in terms of ECs (the study load for one academic year (1,680 hours) totals 60 ECs);
- cc. **Test:** part of an interim examination (*deeltentamen*);
- dd. **University:** the University of Twente (UT);
- ee. **WHW:** the Dutch Higher Education and Research Act (*Wet op het hoger onderwijs en wetenschappelijk onderzoek, WHW*).

Any other terms used can be assumed to follow the definitions ascribed to them by the WHW.

2. Previous education and admission

Article 2.1 Previous education

1. In order to qualify for enrolment in a Master's programme, either a Bachelor's degree obtained through academic higher education (WO) is required, or a Bachelor's degree from a university of applied sciences (HBO) in addition to the successful completion of an appropriate pre-Master's programme. The requirements that the Bachelor's degree must meet are specified in Section B.
2. In the event that a candidate does not have a Bachelor's degree as referred to in Paragraph 1, the Admissions Board of the degree programme will assess the candidate's suitability for admission to the programme on the basis of the requirements stipulated in Section B.
3. The Admissions Board can admit students who lack some prior knowledge, provided they judge that this will not reduce the student's likelihood of successfully completing the programme.
4. The Bachelor's degrees that entitle students to automatic admission are listed in Section B.
5. Additional admission requirements are stipulated in Section B.

Article 2.2 Language requirements

1. To be admitted to the programme, students must be proficient in English.
2. Proof of proficiency in English is required by the successful completion of one of the following examinations or an equivalent:
 - a. IELTS overall band score of at least 6.5
 - b. TOEFL internet based test of at least 90
 - c. Cambridge CAE-C (CPE)
3. The following students are exempt from the requirement to prove their proficiency in English; student who:
 - a. are citizens or nationals of the English-speaking countries listed on the relevant page on the website of the UT (see www.utwente.nl/en/education/master/admission-requirements/international-degree/);

- b. have obtained a relevant Bachelor's degree from an accredited academic institution in the Netherlands;
- c. have obtained a three-year Bachelor's degree in one of the English-speaking countries mentioned on the website of the UT (see www.utwente.nl/en/education/master/admission-requirements/international-degree/) .

Article 2.3 Application and enrolment

1. The deadline for application for admission to the Master's programme is stipulated on the website www.utwente.nl/master. Different application deadlines apply to different types of applicants.
2. After admission, the student must enrol before 1 September or before 1 February.

Article 2.4 Admissions Board

Each programme has an Admissions Board which is appointed by the Dean. The Dean will appoint this board after consulting with the programme directors and Examination Boards of the relevant degree programmes.

Article 2.5 Admissions procedure

1. The Admissions Board is responsible for the admissions to the programme in relation to any students that cannot be admitted directly (see Paragraph 2.1.4).
2. With a view to admission to the programme, the Admissions Board assesses the candidate's knowledge, understanding and skills, including relevant language skills. The Board may request experts from inside or outside the University to test certain types of knowledge, understanding and skills, in order to supplement written evidence from the study programme/programmes the student has already completed.
3. In addition to the requirements , the Board will also assess requests for admission on the basis of the following documents:
 - a. motivation letter;
 - b. English proficiency scores according to Art. 2.2
 - c. diploma
 - d. transcript of records
 - e. curriculum vitae
 - f. abstract of thesis
 - g. course descriptions for programme-specific courses, research methodology courses, mathematics courses and a table of content for the course materials.
4. The Admissions Board may decide that particular units must be included in the Master's programme to compensate for lack of knowledge on the part of the student (homologation courses).
5. Candidates will receive either confirmation of their admission to the Master's programme, admission to a pre-Master's programme or a negative decision. An appeal against a decision can be lodged with the UT Complaints Desk (*UT Klachtenloket*) within six weeks.

Article 2.6 Refusal or termination of enrolment (unsuitability/judicium abeundi)

1. Based on the provisions of Section 7.42a of the WHW, the Dean or the Examination Board may, in exceptional cases, ask the Executive Board to terminate or refuse a prospective student's enrolment

in a programme, if that student's actions or words show that he/she is unsuitable either for practising one or more of the professions for which the programme in question would prepare him/her or for practical preparations for professional practice.

2. If it is believed that a prospective student is unsuitable for the programme, as described in Paragraph 1, the Examination Board or the Dean will initiate an inquiry, and the student will be informed of this promptly. The Examination Board or the Dean will not issue any recommendation without carefully considering the interests involved and giving the prospective student the opportunity to be heard.

Article 2.7 Pre-Master's programme

1. The Admissions Board may decide to admit a candidate to the Master's programme on the condition that a pre-Master's programme is completed successfully before his/her admission.
2. A pre-Master's programme is a bridging programme with a study load of 15 or 30 ECs, to be decided by the admission board.
3. The pre-Master's programme is assembled by the programme director together with the Admissions Board. A fixed programme may be defined for specific groups of students. However, a student may also be given a personalized programme.
4. Proof of the successful completion of the pre-Master's programme, together with the related Bachelor's programme degree, will serve as proof of admission to the relevant Master's programme, in the same and in the subsequent academic year.
5. Candidates are required to complete the pre-Master's programme within one academic year unless otherwise specified. There are two opportunities to take the interim examination for each part of the programme.
6. Students from Dutch Universities of Applied Sciences may be allowed to follow a pre-Master's programme during their Bachelor's programme. Paragraph 5 applies to these students. In this case, the relevant Bachelor's degree, together with the successfully completed pre-Master's programme, will serve as proof of admission to the relevant Master's programme.

3. Degree programme content, structure and rules

Article 3.1 Aim of the programme

The aims and final attainment targets of the Master's programme (Article 7.13 Paragraph 2 (a) of the Higher Education and Research Act) are described in the Section B.

Article 3.2 Programme structure

1. The programme comprises the study units listed in Section B.
2. The scope of the degree programme in ECs is 120. These 120 credits must not include any credits which have constituted part of a previously completed Bachelor's degree audit.
3. If students are required to sign up to participate in a particular study unit, this is only possible during the periods designated for that purpose.
4. Every degree programme has a duration of two years, with each year divided into two semesters.
5. Every semester consists of two periods of ten weeks of education.
6. Master's programmes are taught on a full-time basis.

Article 3.3 Language of Instruction

1. The language of instruction for all Master's programmes is English.

Article 3.4 Exemptions

1. Upon receiving a written request from a student, the Examination Board may exempt the student from taking one or more examination components, if the student:
 - a. has successfully completed a course component as part of a previous university or higher professional education programme that is equivalent in terms of both content and level; or
 - b. has demonstrated through his/her work and/or professional experience that he/she has sufficient knowledge and skills with regard to the relevant course component.
 - c. Students may be exempted from the requirement to participate in practical exercises if they can demonstrate that they have reason to believe that doing so will give rise to a moral dilemma. In such cases, the Examination Board will decide whether the component can be carried out in another manner to be determined by the Board.
2. Exemptions relating to a maximum of 30 ECs may be granted. The Examination Board will grant an exception in extraordinary cases.
3. If an exemption is granted, the course in question must be substituted by another course so that the total number of credits achieved in the programme remains at least 120 ECs.

Article 3.5 Flexible degree programmes

1. The Examination Board for the degree programme decides whether a student may take part in a flexible degree programme as stipulated in Section 7.3d of the WHW. The Examination Board assesses whether the programme is appropriate and consistent within the domain of the programme and whether the level is high enough in relation to the final attainment targets of the programme.
2. The content of the flexible degree programme is determined and motivated by the student and must be equivalent to a regular Master's programme in terms of scope, breadth and depth.
3. The following requirements must be met in order to be eligible for the Master's degree:
 - a. a deviation from the regular Master's programme of at least 30 ECs while ensuring coherence in terms of content
 - b. the level of the programme must match the objectives and final attainment targets that apply to the programme for which the student is enrolled

Article 3.6 Double / combined programmes

A student can obtain diplomas for two UT Master's programmes on the basis of a combined course programme that satisfies the requirements of each individual programme, including the final attainment targets.

The following requirements apply to the composition of combined programmes:

1. The student's programme of courses represents an amalgamation of two (possibly) separate course programmes and satisfies the requirements relating to the final attainment targets of both programmes. Depending on the requirements of the two programmes, there are three possibilities:
 - a. A **combined final project** and **combined internship**, whereby both programmes incorporate a **maximum of 20 ECs from common courses**. This includes not only study units that are part of both course programmes, but also courses for which an exemption has been granted for one course programme on the basis of results achieved as part of the other course programme.

- b. A **combined final project**, but with a **separate internship or no internship**, whereby both programmes incorporate a **maximum of 30 ECs from courses common to both programmes**. This not only includes study units that are part of both course programmes, but also courses for which an exemption has been granted for one course programme on the basis of results achieved as part of the other course programme.
 - c. **Two separate final projects**, with a **separate internship or no internship**, whereby both programmes incorporate a **maximum of 30 ECs from courses common to both programmes**. This not only includes study units that are part of both course programmes, but also courses for which an exemption has been granted for one course programme on the basis of results achieved as part of the other course programme.
2. If a single final project is included that is relevant to both course programmes, as referred to in 1a and 1b, the study load of the final project should be at least 100% of the requirement in ECs for the final project of the programme that has the highest number of ECs plus at least 50% of the requirement in ECs for the graduation project of the other course programme.
 3. If a single internship is included that satisfies the requirements of both programmes as referred to in 1a, the study load of the internship should equal the load of the internship with the highest number of ECs.
 4. Approval for the combined course programme is required from the Examination Boards of both programmes.

Passing the final assessment for a combined programme

Students who complete a course programme as described above take a combined final assessment which they will pass if the assessments included in their file would result in a pass for the final assessment of both programmes individually in accordance with the applicable regulations. The Examination Boards of the programmes involved will decide whether a student will pass the final assessment. The programme management will provide instructions concerning the date of a combined final colloquium.

Article 3.7 Master's final Project

1. Requirements for starting the final project:
 - a. Students must have no more than 10 ECs still to complete, other than the final project;
 - b. If the programme allows for a combined final project and internship, 10 ECs in unfinished courses other than the internship and final project are allowed.
2. The student and the (daily) supervisor must agree on the start date and completion date for the Master's final project.
3. This agreement is to be documented in a plan that takes into account the nominal length of the final project, a reasonable holiday period and any uncompleted study units.
4. The timetable for completion must be approved by the supervisor and signed by the student.
5. Programme-specific regulations regarding the final project are stipulated in Section B.

Article 3.8 Internship

1. The internship is a period of study-related professional practice amounting to 20 ECs and is carried out by the student at a company, university or organization outside the University of Twente.
2. Requirements for starting the internship:
 - a. students must already have obtained at least 45 ECs;

- b. additional requirements may apply for each programme, which will be stipulated in Section B where applicable.
3. A description of the internship must have been drawn up and approved by a member of staff appointed as examiner. This approval must have been obtained before commencing the internship.
4. The student must register with the EEMCS Internship Office at least three months before starting his/her internship.
5. The daily supervisor for the internship is a member of the organization where the internship is being completed. He must be named in the project description, mentioned in Paragraph 3.
6. The supervising UT staff member mentioned in Paragraph 3 supervises the student remotely during the internship. If, in the opinion of this supervisor, adequate supervision is not – or no longer – possible, he/she may decide to take over as the student's daily supervisor.
7. During the internship, the student will write a report about his/her work. At the end of the internship period, this report will be submitted to the daily supervisor. The daily supervisor will assess the report using the relevant assessment form. The assessment will be based on the supervisor's observations of the student and on the report submitted by the student.
8. The supervising UT staff member acts as the examiner for this unit, and will base his/her grade on the assessment made by the company supervisor, the report written by the student and a discussion with the student. The student should submit the report to the UT supervisor within two months of finishing the internship.

Article 3.9 Confidentiality

1. The final thesis report and internship report will be made public unless confidentiality has been deemed necessary (see following Paragraphs).
2. The programme management may declare a (final) report to be confidential for a limited period upon receiving a motivated request to do so:
 - a. A confidentiality request should be made by the first supervisor before the start of the final project or internship.
 - b. A confidential report remains accessible for the supervisor, the programme management, and any members of bodies with the authority to assess the quality of the grading of the entire programme.
 - c. All parties mentioned in 2b are required to respect the confidentiality of the report.
3. If confidentiality is deemed necessary as described in 2, the final thesis presentation may be adapted to avoid making public those matters that are considered confidential.

Article 3.10 Evaluation

To monitor and to improve the quality of teaching, the EEMCS MSc programmes use information about the students' learning experiences. This information is obtained from:

- Internal evaluations
 - Periodic master survey covering a whole semester or quarter
 - Subject evaluations, on request from lecturer, students, or programme director
- External sources
 - National Student Survey (NSE)
 - National Alumni Survey
 - International Student Barometer

4. Examinations

Article 4.1 Signing up for courses and examinations

1. Every student must sign up in SIS in order to participate in a course. It is also mandatory to register before every interim examination opportunity.
2. Notwithstanding Paragraph 1, any student who has correctly signed up to participate in the instruction/classes for a particular course and has been admitted will also be signed up for the subsequent interim examination, unless the degree programme specifies otherwise.
3. The student has the right to inspect recent model test questions or model tests, or old tests and the associated answer keys, along with the standards for assessment.
4. The assessment schedule must be published in the Learning Management System (LMS) at least two weeks prior to the start of the study unit.
5. The assessment schedule must include:
 - a. the learning objectives;
 - b. when and how tests will be administered;
 - c. the relative weighting of the tests;
 - d. any required minimum grade per test
 - e. the resit for each test (if applicable), the form of the resit, when it will take place, and any conditions for participating in the resit;

Article 4.2 Type of examination

1. The course catalogue stipulates how a study unit is to be concluded and the form of any examinations.
2. In the event that a study unit is discontinued, at least one opportunity will be provided in the year subsequent to discontinuation to take the interim examination(s) or parts thereof, and a transitional arrangement will be included in Section B for the subsequent period.
3. At the student's request, the Examination Board may permit a different form of examination than that stipulated in the course catalogue. The examiner may ask the Examination Board to permit a different form of examination on condition that all participants agree.

Article 4.3 Examination opportunities

1. There will be an opportunity to take written or oral exams at least twice a year. Practical exercises can be completed at least once a year.

Article 4.4 Examination results

1. Grades are given on a scale from 1 to 10, with no decimal.
2. ECs will only be awarded for the study unit if an interim examination has been completed with a grade of 6 or higher. No ECs will be awarded for individual components of study units and/or individual tests.
3. If a student receives more than one authorized result for the same study unit, the highest grade will apply.

Article 4.5 Oral examinations

1. Oral examinations are conducted in public, unless the Examination Board has determined otherwise in relation to a particular case.
2. If a third party wishes to be present during an oral test, he/she must submit a request to the Examination Board at least ten working days prior to the oral examination. This does not apply for graduation colloquia.
3. If the Examination Board has determined that members of the Examination Board (or an observer representing the Examination Board) are to be present during the oral examination, it will notify the examiner and the student at least one working day prior to the test.
4. For an oral examination, proof is required that the student was treated appropriately and that the assessment was reliable. This can be shown by, for instance, the presence of a second expert or a video recording of the oral examination. The assessment is documented in a form that shows that the intended learning outcomes have been met.

Article 4.6 Determining and announcing results

1. The result of a written examination or practical exercise is published via SIS within 20 working days. This will be done by BOZ (Office of Educational Affairs).
 - a. The examiner will determine the result of a written examination within 15 working days after the examination and notify BOZ of the result.
 - b. No rights can be derived from examination results published on the LMS or communicated via any medium other than SIS.
2. The result of an oral examination is made known to the student within one working day in the form of authorized proof of the result by the examiner.
3. If the result for a study unit is based on the completion of one or more assignments, or on a written paper or thesis, the date of submission for the final assignment, paper or thesis will count as the examination date.
4. Should the examiner be unable to meet the terms described in Paragraphs 1 and 2 due to extraordinary circumstances, he/she must inform the Examination Board of this, providing reasons for this situation. The student is then informed of the delay by the Examination Board as soon as possible, whereby a new deadline for the result will also be made known. If the Examination Board is of the opinion that the examiner has not met his/her obligations, it may appoint another examiner to ascertain the result of the examination.
5. If a second examination is planned shortly after the first, the results of the first examination will be published at least ten working days prior to the second examination.

Article 4.7 Validity period for results

1. Test results are only valid in the academic year in which they were obtained.
2. The Examination Board may extend this period in individual cases at the request of the student.

Article 4.8 Post-examination discussion and right of inspection

1. The student is entitled to a justification of the results of a test from the examiner, whereby the examiner substantiates the assessment that has been given. If no collective discussion of the results is held, the student may request an individual discussion of the results with the examiner within ten working days of the publication of the results. That discussion must take place at

most five weeks after the publication of the test results in the presence of the examiner or an authorized replacement.

2. The student has the right to inspect his or her work for a period of two years after the assessment.

Article 4.9 Retention of examination results

1. Written examination questions, associated details and the assessed work from written tests will be retained for a period of two years.
2. The retention period for final thesis reports is seven years.

Article 5 Final Degree audit

Article 5.1 Master's final examination

1. The Examination Board determines the result of the Master's final examination after establishing that the student has passed all the study units associated with the programme. The date recorded on the diploma, i.e. the examination date, is the date on which the student successfully completes the last remaining study unit.
2. A diploma can only be awarded after the student has received formal approval for his/her study programme as described in Section B.
3. If the student wishes, he/she may submit a substantiated request in writing to the Examination Board to postpone the declaration of the examination as 'successfully completed' and consequently also to postpone the presentation of the certificate. The student must indicate the duration of the desired postponement in any such request.
4. If the student has requested postponement on the basis of Paragraph 3, the examination date will be the date following postponement on which the Examination Board decides to declare the student as having successfully completed the final examination.

Article 5.2 Diploma and transcript

1. The Examination Board grants a diploma as proof that the student has passed his/her final examination. The Executive Board will determine the model for the diploma and add a diploma supplement to the diploma providing information on the nature and content of the degree programme completed. The diploma supplement will be in English and comply with the European format for such diplomas.
2. The International Diploma Supplement will be appended to the certificate for the successfully completed final examination (WHW, Article 7.11, Paragraph 4).
3. Individuals who have successfully completed more than one component of the programme and who cannot be awarded a diploma as stipulated in Paragraph 1 will, upon request, receive a statement issued by the relevant Examination Board stating which components have been successfully completed as well as the study units involved, the number of ECs obtained and the method of examination for the interim examinations taken.

Article 5.3 Cum Laude

1. The Examination Board checks whether the student has fulfilled all requirements. If the *judicium Cum Laude* ('with distinction') applies, this will be stated on the diploma and the diploma supplement.

2. The *judicium Cum Laude* can be mentioned on the Master's certificate provided the following requirements are met:
 - a. The arithmetic mean of the grades for all study units of the Master's examination programme, excluding the Master's thesis (final project), is at least 8.0
 - b. Those parts of the study programme for which an exemption was granted or which were not graded with a number are not considered when calculating the average grade.
 - c. Exemptions within the programme may be granted totalling a maximum of 15 ECs
 - d. The Master's thesis (final project) is graded at 9 or higher
 - e. No more than one study unit has been graded at 6
 - f. The study programme has been completed within 125% of the nominal duration, starting from the start date recorded in SIS.
3. In individual cases the Examination Board may grant the *judicium Cum Laude* even if not all requirements are met. In particular, a student who only violates the 125% rule due to a 'dead period' preceding his initial enrolment may issue a request to the Examination Board.

6. Student counselling and study progress

Article 6.1 Study progress report

1. Every student can access his/her list of the results achieved in SIS. The student can request a certified study progress overview from the Student Services Desk if required.

Article 6.2 Academic counselling for students

1. The Dean is responsible for student counselling, which includes informing the student of study opportunities inside or outside the programme.
2. Each student is allocated a study adviser.
3. The study adviser will provide advice on study-related matters, as well as any personal problems that may affect the student's studies if the student so desires.
4. If a student wishes to exercise his/her right to specific counselling or special facilities, the student is required to contact the study adviser. The study adviser will record any agreements made with the student, and this agreement is binding on both the student and the Programme Board.
5. The following applies to the entitlement to special facilities:
 - a. demonstrable force majeure or personal circumstances;
 - b. if necessary and possible, special dispensation for participation in examinations or tests and/or the provision of special facilities for examinations or tests. Such dispensation and additional testing opportunities can only be granted by the Examination Board.

7. Studying with a functional impairment

1. In consultation with the relevant student and on the basis of an interview with the study adviser, a decision will be taken regarding which adjustments or facilities referred to in Article 2 of the Equal Treatment Act on the basis of a Handicap/Chronic Illness (*Wet gelijke behandeling op grond van handicap of chronische ziekte*) are considered the most effective for this student.

2. Adjustments are intended to redress specific disadvantages for the student when following the degree programme and/or sitting interim examinations. Where necessary, these may concern facilities pertaining to the accessibility of infrastructure (buildings, classrooms and teaching facilities) and study material, changes to examinations, alternative courses or a personalized study plan. Achieving the final attainment targets of the programme must be guaranteed when implementing changes.
3. On the basis of the interview described in Paragraph 2, the student submits a written application for the facilities in consultation with his/her study adviser. The application is submitted to the Dean of the Faculty, preferably three months before the student is to participate in the classes, examinations and tests for which the facilities are required.
4. The request is to be submitted along with the supporting documentation that is necessary in order to assess the request (such as a letter from a doctor or psychologist registered in the BIG register, or in the case of dyslexia from a healthcare psychologist or special education needs expert, also included in the BIG register).
5. The Dean of the Faculty makes a decision, within twenty working days of receiving the application or earlier if the urgency of the application necessitates it, regarding the validity of the application described in Paragraph 4, and will inform the student and the study adviser of his/her decision.
6. The study adviser ensures that the relevant parties are informed well in advance about the facilities granted to the relevant student.
7. Should the Dean of the Faculty turn down the application in full or in part, the Dean will inform the student of the reason for this and of the opportunity to lodge an objection or an appeal. Objections must be submitted in writing within six weeks of the decision being made known to the relevant party. Objections must be submitted to the Complaints Desk at Student Services.
8. Should extra facilities be granted, the decision will state for which periods of time this grant will apply. The applicant and the study adviser will evaluate the facilities before the end of this period of time. During this evaluation, the parties will discuss the effectiveness of the facilities provided and whether they should be continued.
9. If additional time for a test is granted, such as for students with dyslexia, an additional period of 15 minutes for every regular hour of the test is allowed.

8. Amendments, transitional arrangements, appeals and objections.

Article 8.1 Conflicts with the regulations

If any additional regulations and/or provisions pertaining to teaching and/or examinations conflict with these Teaching and Examination Regulations, the present document (Teaching and Examination Regulations) will take precedence.

Article 8.2 Administrative errors

If, following the publication of an interim examination result, a list of grades, or an overview of a student's progress, an error is discovered, the party discovering the error – be it the university or the student – is required to make this known to the other party immediately and to cooperate in the rectification of the error.

Article 8.3 Amendments to the regulations

- 1) Substantive amendments to these Teaching and Examination Regulations are determined by the Dean in a separate decision.

- 2) Every effort will be made to ensure that substantive amendments to these Regulations do not apply to the current academic year. Substantive amendments to these Regulations may, however, be applied to the current academic year provided the interests of students are not prejudiced within reasonable bounds, or in situations of force majeure.
- 3) Amendments to these Regulations have no effect on earlier decisions taken by the Examination Board.
- 4) Transitional arrangements are arranged in accordance to Article 8.4.

Article 8.4 Transitional arrangement; examination opportunities

- 1) In the case of amendments to the Teaching and Examination Regulations, the Dean may decide to put a transitional arrangement in place.
- 2) Any such transitional arrangement will be published in Section B.
- 3) The following principles will be applicable to any transitional arrangement if a degree programme is changed:
 - a. Changes to a degree programme will be published before the start of the academic year in which they take effect.
 - b. No guarantee can be given that all the study units of a degree programme, as they existed at the time of a student's enrolment in a programme, will continue to be part of the degree programme concerned. The version of the degree programme most recently approved by the Dean will serve as the basis for establishing the results of the Bachelor's examination.
- 4) Transitional arrangement will always specify the following:
 - a. which discontinued study units are equivalent to study units or components thereof in the revised degree programme that is included in Section B;
 - b. if a study unit without practical exercises is removed from the programme, there will be at least two opportunities in the subsequent academic year to take a written or oral examination or to ensure assessment by some other means;
 - c. if a study unit that involves practical exercises is removed from the programme, and during the subsequent academic year no opportunities are provided to complete these practical exercises, at least one study unit will be designated as a suitable replacement for the discontinued study unit;
 - d. the term of validity of the transitional arrangement.
- 5) The transitional arrangement requires the approval of the Examination Board pursuant to the provisions of Paragraph 4.
- 6) In exceptional cases, and provided this works to the student's advantage, the Examination Board may allow a deviation from the number of times and the method by which interim examinations may be taken for a study unit that has been discontinued.

Article 8.5 Appeal and objections

Any appeals against decisions made by the Examination Board or an examiner, and any objections to decisions made by the Dean on the basis of these Regulations, must be submitted in writing to the Complaints Desk at Student Services no more than six weeks after the relevant decision has been communicated.

Article 8.6 Hardship clause

In the event of demonstrable and meaningful unreasonableness and unfairness, the Examination Board may allow exceptions to the provisions of these Regulations.

Article 8.7 Publication

The Teaching and Examination Regulations and the Rules and Regulations of the Examination Board are published on the website of the programme in question.

Article 8.8 Commencement

These Regulations take effect on 1 September 2017 and supersede the Regulations dated 1 September 2016.

SECTION B: PROGRAMME-SPECIFIC SECTION

MASTER APPLIED MATHEMATICS

About this Section

The Teaching and Examination Regulations (TER) are subdivided into two sections (Section A and Section B), which together form the TER. Section A, which can be seen as the faculty section, includes provisions that may apply for all EEMCS Master's degree programmes. Section B contains the provisions that are specific to the particular degree programme, in this case the Master's programme in Applied Mathematics.

1. General provisions

Article 1.1 Definitions

Graduation supervisor: chairholder of the chair chosen by the student to graduate from;

Cohort: group of students enrolled in the same Master's programme who begin in the same year

2. Programme objectives and final attainment targets

Article 2.1 Aim of the programme

The programme aims to educate the students as competent researchers in Applied Mathematics and as academic professionals with the capacity and attitude to further develop him or herself in his/her future career.

The programme envisages educating mathematicians who will use mathematics from the perspective of applications in a societal and multidisciplinary context and who can communicate effectively to others including non-mathematicians.

The master graduates have the following competences:

- a competence in the scientific discipline;
- b competence in doing research and modelling;
- c professional attitude;
- d academic reflection;
- e competence in communicating.

In working to achieve these competences, attention is explicitly focused on alignment with both national and international standards, on reflection on science, technology and society (this is explored in the internship, for example, when students are expected to reflect on the working environment), on presentation and on the feasibility of the programme from the student's point of view.

The educational profile of the programme is characterised on the one hand by the two specializations, **SACS, Systems, Analysis, and Computational Science**, and **OR, Operation Research**, within the programme (see Article 4.2) and by the attention paid to mathematical modelling on the other. See Sections 4.3 and 4.4 for further details.

Students choose a chair within a specialization. During the final phase of the Master's programme, the students act as 'junior members' of the chair they have selected. It is during this phase that the students are given the greatest opportunity to demonstrate that they have acquired the qualities outlined in Article 2.2 by the time they complete their studies.

The focus on mathematical modelling is prevalent in various Master's courses (see Article 4), and especially in the internship and final project (see Article 5 and 6).

Article 2.2 Final attainment targets

The knowledge, understanding and skills students must have acquired upon completion of the programme are as follows:

- Graduates have an in-depth knowledge of mathematics and an insight into its application in different fields such as engineering, health sciences, ICT and business sciences.
- Graduates are able to answer complex research questions with the help of different methodologies. When formulating and solving problems, graduates are capable of determining

whether the mathematical tools at hand suffice, and, if not, they are able to extend theories and methods themselves or otherwise are able to find such extensions in the professional literature.

- Graduates are able to transcend the boundaries of their selected mathematical specialization to a reasonable degree so that they can collaborate on interdisciplinary projects and also are able to formulate new problems in a scientific manner and to arrive at verifiable solutions.
- Graduates are able to function in an engineering environment. Most importantly, they are able to apply mathematical methods and techniques and they have the capacity to integrate components from mathematics and different areas of application.
- Graduates are able to search through, select, analyse the available literature independently and critically and use them in his or her research.
- Graduates are capable of effective written and oral communication with others in the field as well as with laymen.
- Graduates have an adequate comprehension of the development of applied mathematics, its place in society and are aware of its ethical aspects.
- Talented graduates are able to choose to continue their studies by going for a PhD or another postgraduate programme (possibly abroad).

3. Admission requirements

Article 3.1 Additional admission requirements

In addition to 2.1 and 2.2 in Section A the following admission requirements apply:

1. Admission to the programme can be granted only to students who meet the requirements regarding the level of their previously earned diploma's, in accordance with the provisions of Art.7.30b of the Act (WHW).
2. Students in possession of a Bachelor's degree in Applied Mathematics from the Universities of Twente, Delft, and Eindhoven are eligible for direct admission to the programme. Students from other institutions may be subject to additional requirements based depending on their specific educational background and interest.
3. The admissions board can grant admission based on the choice for a specialization and admit a student into only one of the two specializations.

4. Curriculum structure

Article 4.1 Composition of programme

1. The Master's programme is divided into two specializations. Each student chooses a specialization and – within that specialization – a course programme consisting of units of study. Article 4.2 lists all the Master's subjects that are part of the programme.
2. Students can specialise in:
 - Mathematical Systems Theory, Applied Analysis and Computational Science (SACS)
 - Operations Research (OR)
3. The Master's programme is a two-year programme. The curriculum consists of the following elements:
 - a. A minimum of 17 ECs in common subjects (as referred to in articles 4.2 – 4.4).
 - b. A minimum of two Mastermath subjects (national courses offered via elo.mastermath.nl as referred to in articles 4.2 – 4.4)

- c. In addition to a and b. mathematics subjects of a masters level so that the attainment targets of the programme are reached.
- d. Enough electives added to the above subjects so that the total number of ECs adds up to at least 60 EC.
- e. 20 EC on internship
- f. 40 EC on final project.
- g. The Master's programme may contain a maximum of 10 EC's in module-components on a bachelor level (from outside mathematics education) if expertise in that area is so desired, for example in the final project. Alternatively, a maximum of 10 EC's of homologation subjects, these are, also at bachelor level, but including mathematics, may be chosen if these are needed for the successful completion of the programme. Articles 4.3 and 4.4 provide further details on the Master's programme for each specialization.

Internship and final project (60 ECs) may be combined, subject to a minimum of 3 external months (contrary to provision 4.1.3.e and f).

An alternative course programme is possible within the context of a double degree programme together with Universitas Gadjah Mada (UGM), Indonesia which is described in Appendix A: Dual degree programme UGM – UT in Mathematics.

Students with a bachelor degree which includes “educatieve minor met wiskunde tweedegraads lesbevoegdheid” may use the EC's for electives and the 20 EC from the internship to form an alternate packet of 30 EC with didactical/pedagogical subjects, including a internship in a highschool, to obtain the “eerstegraads lesbevoegdheid wiskunde”.

The rules and procedures governing the internship and the final project are specified in articles 5 and 6.

If the student wishes to take a different course than the units of study listed, advance permission must be obtained in writing from the Examination board.

National Mastermath courses

National subjects are offered, coordinated by the Mathematics Coordination Group. See elo.mastermath.nl for a list of these. The examination rules and prerequisites are also posted on this website. These courses are offered in addition to the Master's courses offered as part of the programme. The courses mentioned in 4.1.3.c and 4.1.3.d may be replaced by similar courses from the national curriculum. Contrary to the provision 4.1.3.b, the Examination board may allow to take only 6 EC in national courses. The dispensation can, for example, be based on a better coherence of the master's programme in relation to the final project.

Article 4.2 Overview of the master's programme

The table below lists the Master's programme subjects offered by research chairs as chair subjects. These subjects are given at UT or offered nationally with the involvement of a UT lecturer. Besides the subjects listed in the table below, there are other national courses that can be taken as electives as part of a Master's programme. The total range of national courses offered can be found at elo.mastermath.nl.

Year 1

Course code	Name	EC's	Period
Common mandatory subjects			
191581200	Continuous optimization	6	1A-1B
191551200	Scientific Computing	6	2A-2B
201500510	Pioneers of Applied Mathematics	5	2B
Chair subjects			
191509103	Advanced modelling in science	6	2A-2B
191551161	Applied finite element methods for PDE	6	2A-2B
191506302	Applied functional analysis	6	1A-1B
191531400	Applied statistics	6	2A-2B
201200207	Capita selecta operations research	5	2A
191581100	Discrete optimization	6	1A-1B
191521800	Game theory	5	1A
191571200	Hybrid dynamical systems	5	2B
191561750	Infinite Dimensional Linear Systems	6	2A-2B
191531920	Markov decision theory & Algorithmic Methods	5	1B
191570401	Measure and probability	6	1A-1B
191531940	Network of queues	5	2B
191560430	Nonlinear Dynamics	5	1B
191551150	Numerical techniques for PDE	5	1B
191561620	Optimal control	5	2A
191581420	Optimization modelling	5	2A
201200155	Partial differential equations	6	2A-2B
201500521	Variational Methods for Inverse Problems in Biomedical Imaging	5	2B
191531870	Queueing theory	6	2A-2B
191560671	Robust control	5	2A
191531750	Stochastic processes	6	1A-1B
191561560	Systems and control	6	1A-1B
191550105	Introduction to partial differential equations	5	2A
201200135	Random signals and filtering	5	2A
191571090	Time series analysis	5	1A
191571501	Stochastic differential equations	6	2A-2B
Year 2			
191508209	Internship	20	
191508409	Final Project	40	

Article 4.3 SACS Programme 2017-2018

Intended for students starting the programme in 2017 – 2018

**Chairs: Applied Analysis (AA),
Hybrid Systems (HS),
Mathematics of Computational Science (MaCS),
Multiscale Modeling and Simulation (MMS)**

Components:

1. Continuous Optimization (6 EC)
2. Scientific Computing (6 EC)
3. Pioneers of Applied Mathematics (5 EC)
4. Applied Functional Analysis (6 EC)
5. Optimal Control (5 EC)
6. Applied Finite Elements Methods for PDE (Mastermath) (6 EC)
7. Plus electives in agreement with the graduation supervisor so the entire course programme adds up to at least 60 ECs

Additional requirement: to include at least two mastermath courses

Article 4.4 OR Programme 2017-2018

Intended for students starting the programme in 2017 – 2018

**Chairs: Discrete Mathematics and Mathematical Programming (DMMP),
Stochastic Operations Research (SOR)**

1. Continuous Optimization (6 EC)
2. Scientific Computing (6 EC)
3. Pioneers of Applied Mathematics (5 EC)
4. Three (3) subjects from:
 - Discrete Optimization (Mastermath, 6 EC)
 - Queueing Theory (Mastermath, 6 EC)
 - Game Theory, (5 EC)
 - Markov Decision Theory and Algorithmic Methods (5 EC)
 - Networks of Queues (5 EC)
 - Stochastic Processes (6 EC)
5. Plus electives in agreement with the graduation supervisor so the entire course programme adds up to at least 60 ECs

Additional requirement: to include at least two mastermath courses

Article 4.5 Approval of the course programme

Students can create part of their own course programme using the units of study offered, with due observance of the provisions of Article 4.1. The course programme must be approved by the M-coordinator and graduation supervisor with due observance of the provisions of Article 4.1. Students with a bachelor in Applied Mathematics must have an approved programme by the time that they have earned 18 EC's. Other students should have their programme approved at the start of their study. Approved programmes need to be handed in at the Office of Educational Affairs (BOZ). The study adviser is entitled to approve a later change to the programme that is not to exceed 6 EC without the course programme approval procedure needing to be repeated.

The units of study comprising the course programmes are annually determined for new students and, if necessary, changed for students further along in the degree programme. Each specialization is handled separately. This includes the scope and interrelation of units of study and the schedule of interim examinations. If changes are made, a transitional arrangement will apply to cohorts further along in the degree programme, in accordance with the provisions in Article 8.

Article 4.6 Sequence of examinations

Students may participate in examinations [and/or practical exercises] for the units below only if they have passed the examination or examinations for the units mentioned:

- 191531940 Networks of Queues after passing 191531870 Queuing Theory
- 201200155 Partial Differential Equations after passing 191506302 Applied Functional Analysis
- 191571200 Hybrid Dynamical Systems after passing 191561560 Systems and Control or equivalent
- Internship after passing at least 45 EC of the course load
- final project after passing the internship (except in case of a combined internship and final project)

5 Internship

Article 5.1 Aim of the internship

The 20-EC internship is completed over at least a three-month period. The student spends the time in an off-campus work setting. UT is only eligible as an internship host in exceptional cases, at the discretion of the study adviser, graduation supervisor and Examination board. During the internship, the student performs work determined by the host organisation and in line with the organisation's aims. The work must also be related to the programme both in terms of substance and level. The primary aims of the internship are for the student to:

- experience how to practically apply the knowledge and skills gained from the programme
- learn how to work with colleagues within an organisation and work in accordance with the rules and preconditions applicable to and deemed important by the organisation

At the conclusion of the internship, the student submits a written report about his/her internship.

Article 5.2 Prior to the internship

1. Notwithstanding Article 3.8.4 of Section A, the student contacts the internship coordinator at least six months before the student wants to start the internship in the Netherlands. For internships abroad, the student must contact the internship coordinator about 1 year before the internship starts.
2. The internship coordinator can assist in finding an appropriate placement, taking into consideration – as much as reasonably possible – the student's wishes in terms of, for instance, the type of assignment, type of company, regional placement and term of the internship. The internship will be geared as much as possible to the student's chair.
3. Lecturers may assist the student in finding a suitable placement or the student may find one by himself/herself.

Article 5.3 Internship admission

The programme has an Internship Office to handle the various issues relevant to internships. The internship must be reported to and registered with this office. The following matters must be arranged by the graduation supervisor (or someone designated by the supervisor).

1. The supervisors, AM internship mentor and company mentor are designated (see Supervision).
2. The internship job description is assessed and approved by the AM internship mentor.
3. Prior to starting the internship, the student must have a course programme signed by the M-coordinator and a minimum of 45 EC's of the programme completed.

Article 5.4 Supervision

Two supervisors are designated before the student leaves for the internship location:

1. the company mentor: a member of the staff of the company who assists and evaluates the student at the company.
2. the AM internship mentor: the internship lecturer, who assists with and evaluates the curricula of the internship.

Article 5.5 Evaluation

The AM internship mentor determines a grade for the internship after receiving the report. The company evaluation is also taken into consideration. The internship coordinator verifies whether the report meets the requirements.

6 Final project

Article 6.1 The final project

There are two types of final projects. The final project is either carried out separately (40 EC) or in combination with the internship (60 EC). The internship is completed over a period of at least three months but no more than seven months. Students complete internships off-campus. Only in exceptional cases students may work as trainees at the University of Twente, such to be decided by the study adviser, the graduation supervisor and the Examination board.

The final project must enable the student to apply the expertise gained during prior courses, projects and practical training sessions to solve well-defined problems of sufficient academic difficulty. In completing the final project, students must be allowed to make their own decisions. Students must be able to address the problem systematically, achieve clear results and formulate clear conclusions. Students are expected to report, both orally and in writing, on their findings and read and process relevant literature critically.

Students who choose the combined internship and final project may use part of their EC's to focus on the project theme before leaving and work on their report after their return.

At the beginning of the final project, the student and the graduation supervisor make work agreements. The graduation supervisor ensures that the assignment is in line with the 'mission' of the student's chosen specialization and arranges for adequate supervision.

The student will meet with the supervisors regularly to discuss the progress of the final project. These meetings focus on both the content and the implementation of the final project (comparable to the job appraisal interviews students will encounter later in their career).

To complete the final project, the student must submit a written report and give a public presentation.

Article 6.2 Graduation Committee and Evaluation Committee

The regulations about the composition of the graduation committee and the evaluation committee are laid down by the Examination board in the 'Examinations and Assessment Regulations' (RET).

Article 6.3 Final project admission and eligibility

The student contacts a chair willing to take responsibility for the development, organisation and supervision of the project and/or an external organisation where the project can be performed. The study adviser can help find a chair. The chair can be of assistance in making arrangements with external organisations. The following conditions must be met prior to definitive admission to the final project:

- The M-coordinator has approved the student's course programme.

- A chair/chairs willing to take responsibility for the organisation, supervision and assessment of the graduation project has/have been found.
- Disregarding the final project or combined internship and final project, the student has no more than 10 EC of uncompleted courses to be eligible for the Master's programme final assessment.

Article 6.4 Rules for supervising and evaluating final project

The graduation supervisor is responsible for ensuring that there is proper supervision and evaluation during the course of the final project.

One part of supervising would-be graduates is to create a graduation file where correspondence between the student and graduation committee is saved, along with the agreements made as a result.

The student ensures that his or her file includes reports of any obstacles beyond the student's control that he or she has encountered while working on the final project, such as special personal circumstances, changes at the company where the student is performing his/her project, inadequate facilities or requisite information not being available on time. The graduation committee and supervisors ensure that work schedules and all additional agreements with the student are kept in the file. In particular, the file also includes work done in advance of the student's departure for the internship location as part of a combined internship and final project. During the final evaluation of the final project, explicit consideration is given to the work included in the file but the report does not necessarily have to describe that work in detail.

No later than 5 weeks before the final project is due, the student and graduation committee confer on the project's status. A report of this meeting is saved in the file and states the project due date (rescheduled if necessary), as well as any corrective changes to the project description and supervision. The student confirms that he or she approves of the report and the updated agreements. Any time an extension of more than a month is granted (not including holiday periods), a new report is inserted in the file no less than three weeks before the extension is to expire.

7 Degree

Students who have successfully completed their Master's final examination are awarded a Master of Science degree. The degree awarded is stated on the diploma. If it is a joint degree, this will also be stated on the diploma.

8. Transitional and final provisions

Article 8.1 Transitional provisions

Notwithstanding the current Teaching and Examination Regulations, the following transitional provisions apply for students who started the programme under a previous set of Teaching and Examination Regulations:

1. Rule regarding valid grade (highest versus latest)

Motivation: Change of rule starting from cohort 2009

Validity: This arrangement is valid for unlimited time

Provision:

While applying Article 4.6.3, Section A, to decide about a valid grade for a unit of study for which sittings have taken place before 1 September 2009, the grade that was valid on 31 August 2009 will be considered. The new rule is not applicable to those previous sittings.

2. Rule regarding passing the final assessment

Motivation: Change of rule starting from cohort 2011

Validity: This arrangement is valid for unlimited time

Provision:

Contrary to Article 4.6 and 4.10 of Section A (Fail/Pass Guidelines) of the Examination and Testing Regulations, a student who started the programme before 1 September 2011 may pass the final assessment with (at most) one five and no marks under five in the list of marks, provided the average of the marks is at least six.

3. Rule regarding the specialization Financial Engineering for students of cohort 2011 or before

Motivation: Discontinuation of Financial Engineering from 2012-13

Validity: This arrangement is valid for unlimited time

Provision:

A student who has started the programme with specialization Financial Engineering before 1 September 2012 may continue to earn his/her master's diploma with the programme which is already approved, including the (alternative) academic activities in the second year, namely, 30 EC coursework and 30 EC for combined internship and final project.

4. Rule regarding the specializations Mathematical Physics and Computational Methods and Mathematics and Applications of Signals and Systems for students of cohort 2014 or before

Motivation: Discontinuation of MASS and MPCM per 2015-2016

Validity: This arrangement is valid for unlimited time

Provision:

A student who has started the programme with specializations MASS or MPCM before 1 September 2015 may continue to earn his/her master's diploma with the programme which is already approved.

5. Rule regarding the subject Philosophy of Engineering for students of cohort 2015 and before.

Motivation: Replacement of Philosophy of Engineering with Pioneers of Applied Mathematics

Validity: This arrangement is valid for unlimited time

Provision:

A student who started the subject Philosophy of Engineering in the previous year is allowed to complete the course in 2016 as long as it is part of a programme which is already approved. Students who will start the subject in 2016 need to replace the course with pioneers of applied mathematics, unless this causes scheduling issues. In which case the student can ask the examination board for an exemption.

Article 8.2 Publication

1. The dean will ensure the appropriate publication of these Regulations and any amendments to them.
2. The Teaching and Examination Regulations will be posted on the faculty website.

Article 8.3 Effective date

These Regulations enter into force with effect from 1 September 2017.

Appendix A: Dual degree programme UGM – UT in Mathematics

This dual degree programme starts every September and is embedded in the Master of Science Applied Mathematics (UT) and the Master of Science in Mathematics (UGM). The dual degree programme follows to so-called 1 + 1 scheme, i.e., a student studies the first year at UT and the second year at UGM. The study load is equally distributed (50:50) between UGM and UT. It is set up so that it complies with the final qualifications of both programmes and respects the respective requirements in terms of compulsory courses.

After successful completion of the programme, the student will be awarded the following degrees:

- Master of Science (M.Sc) from UGM, and
- Master of Science (MSc) in 'Applied Mathematics' from UT.

Article A1 Entry year University of Twente

Specialization Operations Research (OR)

The entry year for students with the OR specialization consists of:

1. Three (3) compulsory AM courses:
 - a. Continuous Optimization (6 EC)
 - b. Scientific Computing (6 EC)
 - c. Pioneers of Applied Mathematics (5 EC)
2. Five (5) compulsory OR courses:
 - a. Game Theory (5EC)
 - b. Measure and Probability (6EC)
 - c. Markov Decision Theory and Algorithmic Methods (5 EC)
 - d. Queueing Theory (6 EC)
 - e. Networks of Queues (5 EC)
3. Electives within the OR specialization so that the total amount of EC in the first year is at least 60.

Specialization Systems Theory, Applied Analysis and Computational Science (SACS)

The entry year for students with the SACS specialization consists of:

1. Three (3) compulsory AM courses:
 - a. Continuous Optimization (6 EC)
 - b. Scientific Computing (6 EC)
 - c. Pioneers of Applied Mathematics (5 EC)
2. Four (4) specialization courses:
 - a. Applied Functional Analysis (6EC)
 - b. Optimal Control (5EC)
 - c. Applied Finite Elements (6EC)
 - d. Measure and Probability (6EC)
3. Electives within the specialization so that the total amount of EC in the first year is at least 60.

Article A2 Exit year at the University of Twente

The exit year at the University of Twente will consist of a practical internship (20 EC, as described in Article 5) and a final thesis project (40 EC, as described in Article 6) with one of the research chairs in the specialization:

SACS Chairs

Applied Analysis (AA),
Hybrid Systems (HS),
Mathematics of Computational Science (MaCS),
Multiscale Modeling and Simulation (MMS).

OR Chairs

Discrete Mathematics and Mathematical Programming (DMMP),
Stochastic Operations Research (SOR).
