

Transitional Arrangements 2019-2020

The transitional arrangements are part of the programme specific appendix to the 2019-2020 Teaching & Examination Regulations of the bachelor Technical Computer Science of the faculty Electrical Engineering, Mathematics & Computer Science of the University of Twente.

Module codes

Modules have received new course codes. The table below shows the current and old course codes. Students need to register for modules under the current course code.

<i>Module name</i>	<i>Current course code</i>	<i>Old course codes</i>
Pearls of Computer Science*	201700139	201300070
Software Systems*	201700117	201300071 and 201500111
Network Systems	201600146	201300179
Data & Information	201700279	201300180
Computer Systems	201400210	
Intelligent Interaction Design	201800421	201400256, 201500118, 201600105 and 201700269
Discrete Structures & Efficient Algorithms	201800141	201400433 and 201600270
Programming Paradigms	201400537	
Smart Spaces	201500057	
Web Science	201700273	201500025
Cyber-Physical Systems	201500053	

*For the modules "Pearls of Computer Science" and "Software Systems", either both have to be done in the version with the new course code, or both have to be done in a version with an old course code.

Transitional Arrangements

1. **Math A+B1 (Introduction to Math + Calculus 1A) and Math B2 (Calculus 1B)**

Result of: Change in contents Math B1 and Math B2 since 2017

Period of validity: until 1 September 2021

Content of transitional arrangement:

The content of the math component of the module Pearls of Computer Science and Software Systems have changed as of the academic year 2017-2018. There were offered several extra opportunities until last academic year. From now there will be no tests old style math anymore.

In case a student has to repeat Math A+B1 and/or Math B2, the student has to take the lectures and tests covering the new math contents of both modules. In all such cases a student should pass Introduction to Math + Calculus 1A and Math B2, also if one old style math already was passed.

2. *Individual Study Programme*

Result of: introduction TEM

Period of validity: indefinite

Content of transitional arrangement:

Students who were registered as a bachelor student Technical Computer Science prior to 1 September 2013 have to compose an individual study programme that meets the programme intended learning outcomes of the bachelor Technical Computer Science in consultation with the programme coordinator. The individual study programme has to be filed for approval by the examination board.

3. *Double degree TCS AM*

Result of: change in order

Period of validity: indefinite

The project of statistics has been moved from the third year first quartile, to the second year first quartile. Now the project of Statistics can be done at the same time as the course Statistics. To make this possible Discrete Math, part of the module Computer Systems, has been moved to the first quartile of the third year.
