

Dear Students,

You have been abroad for your studies, whether during your minor modules as a bachelor student or following electives or replacement courses for masters students.

In order to finalize this we request you to write a short (one A4) reflection report about your experience studying abroad. This information is for us at the mobility office to learn from your experiences how to better support you and future students, to create a database of information about the countries and universities we have partnerships with for future students to gain useful insight of the place they want to go to.

The following information would be useful to mention:

- Where did you go and which courses or field of study did you follow courses?
- Why did you choose that destination
- Would you recommend this destination/university to other students? Why / Why not?
- How was your reception and contact with host university?
- What were your experiences in terms of the method of teaching?
  
- Experiences about the country/place/culture.
- How was housing arranged? Availability? What were experiences in this area?
- How did you experience the social life/activities organized or things to do?
- Do you have certain tips for future students going to this destination?

Feel free to add any other information you think is relevant for us or other students to be aware of. Do you have any tips or recommendations for future students going to this destination?

Lastly could you please indicate (tick what is applicable) whether you would agree/not agree for us to provide possible new students your email address to ask you specific questions about your experiences?

- I agree you can share my email address with a new student interested to study abroad
- I do not agree that you share my email address with a new student interested to study abroad

Please hand in this form and your reflection report to Jitske Rijken, zilverling room 1032 or via email: [studyabroad-eemcs@utwente.nl](mailto:studyabroad-eemcs@utwente.nl)

Kind regards,

Jitske Rijken
