

# Curriculum Vitae Edwin van Asseldonk, PhD

Assistant professor  
Biomechanical Engineering  
MIRA  
University of Twente

PO Box 217  
7500 AE Enschede, The Netherlands  
[e.h.f.vanasseldonk@utwente.nl](mailto:e.h.f.vanasseldonk@utwente.nl)  
Phone: +31 53 4892446  
Fax: +31 53 4893695

## Personal information

---

Date of birth            March 28, 1978  
Place of birth          Erp  
Address                Emmalaan 3, 6571 AK, Berg en Dal  
Citizenship            The Netherlands  
Marital Status        Married

## Interests

---

- Neurorehabilitation
- Rehabilitation robotics
- Neuroplasticity
- Non invasive stimulation of the central nervous system
- Human motor control and adaptation

## Education and personal development

---

2001                    Master Faculty of Human Movement Science, Free University, Amsterdam  
2009                    Mentoring program  
2010                    Course: time management.  
2012                    Course: effective coaching and managing for coordinators : Effective communication, situational leadership, intervension and coaching, conducting difficult conversation, conflict management, providing feedback.  
2014                    University Teaching Qualification

## Positions held

---

2001 – 2001            Research assistant, Institute for Research in Extramural Medicine, Free University, Amsterdam  
2001 – 2002            Researcher and Matlab programmer, Department of pediatric physical therapy, Radboud University Nijmegen Medical Centre, Nijmegen  
2002 – 2007            PhD student, Department of Biomechanical Engineering, University of Twente, Enschede  
2008 – present        Assistant professor at Department of Biomechanical Engineering, University of Twente, Enschede  
2015 – present        Adjunct professor at Department of Physical Therapy and Human Movement Sciences, Northwestern University, Chicago

## Teaching

---

1997 - 2000            Teaching assistant Biomechanics, Nerve, muscle, skeletal modelling, Faculty of Human Movement Sciences, Free University of Amsterdam  
2003 - 2004            Teaching assistant bachelor course Statics, Mechanical Engineering, University of Twente.  
2005 - present        Supervision of master and bachelor students in final thesis research

2007 - 2009	Lecturer master course Human Movement Control, Mechanical Engineering, Biomedical Engineering, University of Twente
2007 - 2010	Lecturer bachelor course Mens in Beweging, Technical Medicine, University of Twente
2010 - present	Coordinator master course Human Movement Control. Mechanical Engineering, Biomedical Engineering, University of Twente
2015 - present	Lecturer bachelor course De bewegende mens, Technical Medicine, University of Twente
2015 - present	Lecturer master course Biomechatronics, Mechanical Engineering, Biomedical Engineering, University of Twente

## Funding

---

Past

<b>Title:</b> Effect of gait training with a new robotic gait trainer (LOPES) in chronic stroke survivors	<b>PI:</b> Jaap Buurke
<b>Number:</b> NA	<b>Period:</b> 2008-2009
<b>Source:</b> KNGF (Royal Dutch Society for Physical Therapy)	<b>Costs:</b> 40 k€
<b>Description:</b> In this project the first clinical evaluation of the gait rehabilitation robot LOPES was performed in chronic stroke survivors.	

<b>Title:</b> Priming the brain for robotic training	<b>PI:</b> Edwin van Asseldonk
<b>Number:</b> NA	<b>Period:</b> 2010-2014
<b>Source:</b> NWO-VENI	<b>Costs:</b> 250 k€
<b>Description:</b> This project aims to enhance cortical plasticity and functional recovery in stroke survivors by the integration of cortical brain stimulation in robotic gait training	

<b>Title:</b> Robotic gait trainer	<b>PI:</b> Demon (B. Screever)
<b>Number:</b> NA	<b>Period:</b> 2009-2014
<b>Source:</b> PIDON	<b>Costs:</b> 375 k€
<b>Description:</b> Follow up project of LOPES. Development of robotic gait trainer suited for a clinical setting and which will be evaluated within the project period in a clinical trial with acute stroke survivors and spinal cord injury subjects.	

Ongoing

<b>Title:</b> BALANCE Balance Augmentation in Locomotion, through Anticipative, Natural and Cooperative control of Exoskeletons	<b>PI:</b> Jan Veneman (Technalia)
<b>Number:</b> FP7 ICT2011.2.1	<b>Period:</b> 2013-2017
<b>Source:</b> EU STREP	<b>Costs:</b> 588 k€
<b>Description:</b> This project aims to realize an exoskeletal robot that improves the balance performance of humans, targeted at users facing balance-challenging conditions or suffering from a lack of ability to walk or maintain balance during walking.	

<b>Title:</b> NeurAS: NEURoControl- Assessment and Stimulation	<b>PI:</b> Frans van der Helm (TU Delft)
<b>Number:</b> NA	<b>Period:</b> 2013-2016
<b>Source:</b> ZonMW	<b>Costs:</b> 332 k€

**Description:** This project aims to improve the outcome of gait training in spinal cord injury patients through development of a novel non-invasive stimulation paradigm that in combination with robotic support promotes neuroplasticity.

<b>Title:</b> Motor skill Learning in Older ADults: neurocognitive correlates, individual differences, and interventions to enable healthy aging	<b>PI:</b> Willem Verwey
--	--------------------------

<b>Number:</b> NA	<b>Period:</b> 2014-2017	<b>Effort:</b> 5%
<b>Source:</b> NWO - Open Research Area Plus	<b>Costs:</b> 213k€	<b>Role:</b> Co-PI

**Description:** This project aims to understand the effect of age on learning new motor skills and to assess how non-invasive brain stimulation (tDCS) can increase the capacity of older individuals to learn.

<b>Title:</b> AWARD: Assessment during Walking using A Robotic Device	<b>PI:</b> Herman van der Kooij
---	---------------------------------

<b>Number:</b> NA	<b>Period:</b> 2013-2019	<b>Effort:</b> 5%
<b>Source:</b> STW	<b>Costs:</b> 454 k€	<b>Role:</b> Co-PI

**Description:** This project aims to improve the outcome of robot-aided gait training by tailoring the robotic support to the individual patient's impairments. We will develop and evaluate protocols and algorithms to quantify the primary motor impairments while subjects are actually walking.

<b>Title:</b> Symbitron	<b>PI:</b> Herman van der Kooij
-------------------------	---------------------------------

<b>Number:</b> FP7 ICT-2013.2.1	<b>Period:</b> 2014-2018	<b>Effort:</b> 5%
<b>Source:</b> EU STREP	<b>Costs:</b> 844 k€	<b>Role:</b> Co-PI

**Description:** In this project we will develop personalized wearable exoskeletons for SCI patients that are biologically inspired controlled

<b>Title:</b> Efficacy of Assist-As-Needed (AAN) Robotic gait Training in sub-acute Stroke survivors	<b>PI:</b> Jaap Buurke
--	------------------------

<b>Number:</b> NA	<b>Period:</b> 2014-2018	<b>Effort:</b> 2%
<b>Source:</b> ZonMW	<b>Costs:</b> 10k€	<b>Role:</b> Co-PI

**Description:**

## International experience

---

- 2001 Jan – May Internship under supervision of Prof G.L. Gottlieb at the Neuromuscular Research Centre, Boston University, Boston, USA.
- 2005 May – Aug Visiting predoctoral fellow at the Neuro Imaging and Motor Control lab of Prof J. P. Dewald at Physical Therapy & Human Movement Sciences, Northwestern University, Chicago, USA.

## Awards, recognition

---

- 2000 Master student prize of the Faculty of Human Movement Sciences (Gerrit-Jan

	van Ingen-Schenau scholarship). The grant amounts to fl 7500,- and allowed me to perform a research project at Boston University.
2001	Master, cum laude
2004	Poster presentation award, 11th Dutch annual conference on BioMedical Engineering (iBME),
2008	Second place Best PhD thesis in Human Movement Sciences
2009	Personal Veni grant

### **Organization national and international academic events.**

---

- Workshop co-chair. "Robotic systems for training and assistance of walking". IEEE International Conference on Robotics and Automation (ICRA) May 16-21, Stockholm, Sweden. Submitted
- Workshop co-chair. "Robotic systems for training and assistance of walking". International Conference On Rehabilitation Robotics (ICORR), August 11 2015, Singapore, Singapore.
- Workshop co-chair. "Robotic systems for training and assistance of walking". International Conference on Rehabilitation Robotics, August 11 2015, Singapore, Singapore.
- Session chair "Non-invasive direct current stimulation and its application for motor neurorehabilitation" Congress on Neurorehabilitation and Neural Repari, May 21 and 22 2015, Maastricht, the Netherlands.
- Session chair " Non-invasive brain stimulation: opening up new horizons in neurorehabilitation?" at the Dutch Congress of Rehabilitation Medicine, November 6 and 7 2014, Rotterdam, The Netherlands
- Organizing committee 1st UAE meeting on Neurerehabilitation, March 9-10, 2012, Abu Dhabi, United Arab Emirates.
- Session chair of the 4th symposium of IEEE Benelux Chapter on Engineering in Medicine and Biology Society. November 9-10, 2009, Enschede, The Netherlands

### **Other academic activities**

---

- Member of the Society for Neuroscience, Dutch Society for Neurorehabilitation, IEEE
- Reviewer for: Neurorehabilitation and neural repair, IEEE Transaction on Neural Systems and Rehabilitation Engineering, Experimental Brain Research, Archives of Physical Medicine and Rehabilitation, Gait and Posture, IEEE Transaction on Robotics

### **Management Activities (education & research)**

---

2012	Twente graduate school committee for MIRA
2013 - present	Committee Neural and Motor system for redesign master Biomedical Engineering
2014 - present	MIRA Institute Council
2015 - present	Management board of the IMDI CoRE Neurocontrol.

### **Publications**

---

PhD thesis

**Van Asseldonk EHF.** Restitution and compensation in the recovery of function in the lower extremities of stroke survivors. University of Twente, 2008, p. 180. ISBN: 978-90-365-2640-1

Book Chapters

## Invited talks international

---

*"Taking robotic gait training to the next level"*, October 6 2015, 2nd International Autumn School on Movement Science, Berlin, Germany

*"Human-inspired balance strategies in the control of exoskeletons"*, August 11 2015, Workshop Robotic Systems for Training and Assistance of Walking at the International Conference on Rehabilitation Robotics, Singapore, Singapore.

*"Exoskeletons for the upper and lower extremity"*, June 3, 2015, Symposium Rehabilitation Institute of Chicago, Chicago, USA.

*"Transcranial direct current stimulation enhances propulsion during walking"*, June 24-26, International conference on NeuroRehabilitation, Aalborg, Denmark.

*"Revalidatierobots door en voor gangbeeld analyse"*, November 6 2014, SMALL symposium, Nijmegen, The Netherlands

*"New concepts in robot-aided gait training"*, November 12-16 2013, 90th Annual Conference, American Congress of Rehabilitation Medicine (ACRM), Orlando, USA.

*"Modulating lower limb learning with non-invasive brain stimulation"*, April 8-9 2013, COST Symposium: Rehabilitation robotics – clinical evidence and technical developments, Enschede, The Netherlands.

*"Transcranial Direct Current Stimulation (tDCS) in stroke patients"* March 9 2012, 1st UAE Meeting on Neurorehabilitation Abu Dhabi, United Arab Emirates.

*"Feasibility of selective robotic support of foot clearance with continuously adapting impedance*

*levels*", September 10 2009, World congress 2009 Medical physics and biomedical engineering, Munchen, Germany.

### **Invited talks national**

---

"*Taking robot-aided gait training to the next level*", March 17 2015, Symposium Neurorevalidatie, Deventer.

"*High tech revalidatie: robot ondersteunde looptraining voor patiënten met dwarslaesie of CVA*", January 7, 2015, Day of Science: Tech or Not, Nijmegen.

"*The effect of non-invasive stimulation on lower limb motor control and learning*", November 6 2014, Dutch Congress for Rehabilitation Medicine 2014, Rotterdam,

"*Kun je lopen met bionische benen?*", November 2, 2014. Museum Jeugd Universiteit, Enschede.

"*Non invasive stimulation of the Central Nervous System to promote neuroplasticity in neurological patients*", June 25, 2013, MedTechWest event, Delft.

"*Robotic developments lower extremity (e.g. LOPES)*", November 2, 2012, Dutch Congress for Rehabilitation Medicine 2012, Noordwijkerhout,

"*Integratie van inzichten over motorische adaptatie in robot-ondersteunde neurorevalidatie*", May 29 2012, Symposium: Nieuwe perspectieven op de bewegingssturing van de arm en hand bij centrale parese, Nijmegen.

"*Task specificity of robot aided gait training*", December 9 2011, MIAS Symposium: Rehabilitation Robotics: a promise for the near future?, Enschede.

"*Robot training in revalidatie*", May 25 2011, Symposium Studiosi Mobilea: op naar de top, en er voorbij, Groningen.

"*Robot aided gait training in treatment of neurological patients*", November 29 2011, BW-middag: Revalidatie met stappen vooruit!, Nijmegen.

"*Robot ondersteunde looptraining met LOPES*", March 18 2009, CVA: nieuwe zorg, nieuwe kansen!, Den Haag.

"*In balans: relatie tussen gewicht nemen en houdingscontrole na een CVA*", November 30 2006, CVA revalidatie, een nieuwe koers, Enschede.

### **Mentoring**

---

Graduate advisor of

2008 - 2014	Bram Koopman, Everyon PhD Thesis: Robot aided gait training and assessment. December 10, 2014. Assistant promotor
2008 - 2009	Ditske de Lange, Virturob
2009 - present	Jos Meuleman, LOPES
2009 - 2014	Alexander Otten, Virturob
2010 - present	Letian Wang, MindWalker
2010 - 2011	Ayşe Neşe Tüfekçiler, LOPES
2013 - present	Mark Vlutters, Balance
2013 - present	Alexander Kuck, ZonMW Neuras
2014 - present	Amber Emmens, Symbitron
2015 - present	Annerieke Nijman, Symbitron
