

# Combustion Award

**Do you want to boost your career in combustion/energy technology?**

**Manifest yourself in the business and take the € 1000 home!**

The NVV (Nederlandse Vereniging voor Vlamonderzoek) is an association of companies and institutes based in the Netherlands and Belgium that have interest in research and education in the area of combustion technology.

To further promote the NVV and combustion research, the NVV annually rewards the student with the best Master thesis in the field of combustion technology that satisfies the objectives of NVV.

### Prize

The prize consists of € 1000,— and will be handed over during the Combura conference in October 2015.

The candidate is expected to present the work done for the thesis during the Combura conference in a 20 min. presentation.

The paper related to the thesis has a chance of being published in the IFRF journal.

### Conditions

To win the prize the following conditions need to be satisfied:

- The topic covers one or both of the following areas in the subject of combustion and gasification of gaseous, liquid and/or solid fuels
  - o Measurements
  - o Model development
- The thesis must have been made in the framework of graduating (MSc) at a scientific institute in the Netherlands or Belgium.
- It is graded with an eight (8) or higher (or Belgium equivalent)
- It must be written in Dutch or English
- The graduation took place between 1<sup>st</sup> of august 2014 and 31<sup>st</sup> of July 2015

### Submission

Send three copies of the graduate work or the PDF file of the thesis to the NVV together with a 1 page executive summary and your application form. The final date of submission is the 7th of September 2015.
