* equalization courses only for non BSc TBK students. Other students to discuss with specialization coordinator

** 201400174, Data Science is also offered in the third quartile (2015-2016)

(+) Students who already finished this MSc course before the master, have to contact the specialisation coordinator

WARNING If you consider going abroad for a semester obligatory courses should be planned carefully.

How to plan your program

All students join obligatory courses in the first quartile. During this first quartile you discuss your ideas about your individual program with you specialization coordinator. Draft your plan:

- 1 Write down your obligatory specialization courses
- 2 Complete your IEM study program up to 120 EC with:
 - a) equalization courses, to discuss with the specialization coordinator
 - b) other technical UT master courses (i.c. IEM)
 - c) master courses from other (inter)national technical Master program's
- 3 Discuss your complete study program (and your personal motivation) with your study counselor
- 4 Get a final approval from your specialization coordinator

Implementation of non-technical or (inter)national courses needs approval from the specialization coordinator and the exam committee.
