

Miicraft Material List

Curing time suggestion (sec.)

BRAND	TYPE	LAYER	MiiCraft NVP+ 405nm	MiiCraft 125 405nm	PROPERTIES	IMAGE
Miicraft	BV001 (Cream)	100um 50um 30um	7.00 4.50	1.30~1.50	Standard resin and most cost effective Application for all model	
	BV002 (Dark blue)	100um 50um 30um	7.00 4.50	1.30~1.50	Standard resin and most cost effective Application for all model	
	BV003 (Clear)	100um 50um 30um	6.50 4.50	1.05~1.25	Transparent resin and fine performance Application for all model	
	BV004 (Pink)	100um 50um 30um	7.00 4.50	1.30~1.50	High stability resin and most cost effective Application for dental model	
	BV005 (Ivory)	100um 50um 30um	7.00 4.50	1.30~1.50	High stability resin and most cost effective Application for dental model	
	BV007 (Clear)	100um 50um 30um	8.50 4.50	1.40~1.60	Low viscosity resin and smallest microchannels Application for 3D microfluidic devices	
	BV011 (Palegreen)	100um 50um 30um	7.00 5.00	1.30~1.50	Dental castable resin Application for fast investment casting	
	BV012 (Orange)	100um 50um 30um	6.00 3.50	2.10~2.50	Jewelry castable resin Application for direct investment casting	

Material List NO.2016.05.21

More material test will be completed and added into this list in the near future since the experiments.
Please follow our newest result and keep the list NO. up to date.
