

# October 2023

## APA citation format updates

Render and export updates to align with [APA 7th edition](#)

Multiple format updates have been added to the APA citation format to align content in Pure with APA guidelines.

Article number update: citation reference now includes the article number (where relevant).

Example: Authors (2021). Title. *Journal*, 67, **Article 102024**. <https://doi.org/>

E-pub ahead of print update: 'Advance online publication' status included in citation reference.

Example: Authors (2021). Title. *Journal*. **Advance online publication**. <https://doi.org/>

Accepted/In press update: 'in press' status included in citation.

Example: Authors (**in press**). Title. *Journal*. <https://doi.org/>

Conceptually related titles update: For conceptually related titles, the series title should not be included in the citation reference. Whereas for a book that is part of a multivolume work with volume numbers, the series title is included in the reference.

Example - conceptually related: Authors (2021). Title. In Editor names (Eds.), reference title (pp. 83-93). Routledge.

Example - not conceptually related: Authors (2021). Title. In Editor names (Eds.), reference title (pp. 83-93). (**Series title**) Routledge.
