

Plum metrics: discontinuation of Twitter/X metrics

Regrettably, due to the unforeseen and unmanageable costs associated with procuring Twitter/X data, it is with regret that Elsevier announces the discontinuation of Twitter/X as a source of metrics within PlumX. All Twitter sourced metrics will be removed from PlumX Metrics across all Elsevier solutions—inclusive of Pure and Scopus.

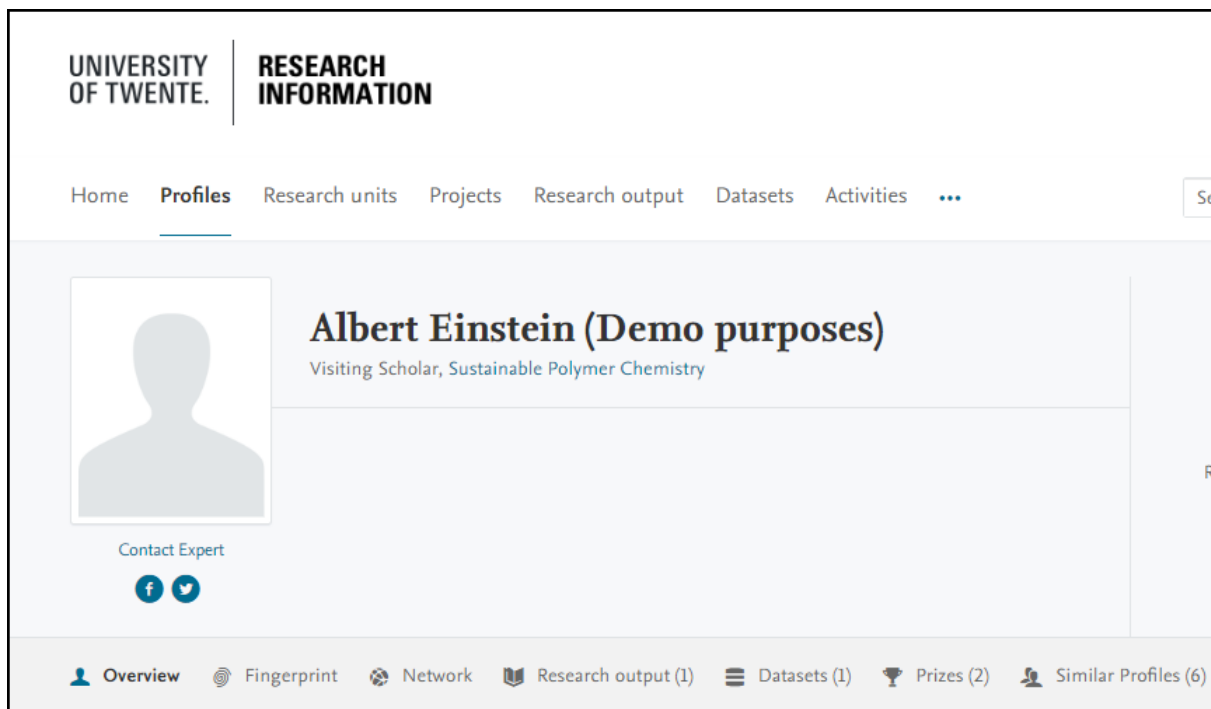

External affiliations possible on Activities

Adding and saving external affiliations on activities is now in line with what is possible on Research outputs. Activities conducted by researchers at previous institution(s) can now be imported/created and showcased with ease.

Display of Activities at external organisations in your personal page in the back-end:

The activity however will not be visible on the University of Twente Research information Portal because it is not an UT-affiliated activity.

Option to switch the h-index display on or off in your personal profile

Portal profile

Use this tab to control how content is shown on your profile in the Pure Portal.

Collaboration Map

If Off, the Collaboration Map is hidden from both the Overview and Network sections of your profile on the Pure Portal. Note: Only the map is hidden, not the Network section.

Show Collaboration Map on profile

On

Show US map only

Off

Show affiliations

Select the organisational unit affiliations to be shown on your profile on the Pure Portal. By default, all your active organisational unit affiliations are shown. If you hide an affiliation it may still be present on the Pure Portal on other pages, but it is not shown on your personal profile.

Sustainable Polymer Chemistry

Show metrics

Select the metrics to be shown for your content (where available) on your personal profile on the Pure Portal. By default, all available metrics configured by the administrators at your institution are shown. If you hide metrics, they may still be shown on other pages, such as your co-authors' profiles.
