

	Videolecture	Theaterlecture	Pencast	Screencast / Slidecast	Microlecture
What? (explanation)	Recording of a regular educational meeting (e.g. lecture) with one camera.	Pre-produced recording of a "regular" educational meeting, with students. Through use of >3 camera's and audio equipment, interaction with students is properly recorded. Use of attributes is possible, if needed.	Recording with computer and /or drawing tablet by lecturer. Recording is done by desktop software, including voice. Camtasia is available at the University of Twente (for Windows and Mac OS X). Preparation needed!	Recording done by lecturer by using his/her own computer (and software) and voice. For this purpose the software product Camtasia is available at the University of Twente (for Windows and Mac OS X). Preparation needed!	Recording of a lecturer with 2 camera's, who discusses a specific theme, without audience. Recorded in a studio, or at a properly lit location. Preparation needed!
When (educational purpose)	Offers students the opportunity to watch lectures again, in their own time, at their own workplace etc. (also useful for missed lectures)	Offers students the possibility to view the educational event at a later time. Reuse for other target groups (minor courses, february intake, part-time programmes etc) is possible.	Explanation of complex theoretical concepts, where graphical representation is of relevance. For example used to prepare a seminar.	For the explanation of software applications or (mathematical) calculations. Or the recording of a powerpoint slideshow with audio.	Explanation of key concepts for a module or module- component. As a reference to demonstrate during teaching or for consulting during selfstudy.
