

The *test and taste* garden (# 17) and the cold frame in spring
All BTD-members can pick in the herb garden, in garden 17 and transplant from the cold frame. The first lettuce plants can be transplanted from now on. There are different kinds of lettuce available, as you can see on the laminated plan in the mailbox in the toolshed. You can also find this plan when you click *Gardening tips* and there *Plan garden 17*.
