Evaluation Report Discrete

Optimization of Business Processes

The evaluation committee has evaluated the course Discrete Optimization of Business Processes (DOBP) by sending an online questionnaire to 64 students. 12 students filled in the questionnaire, which gives a response of 19%.

The overall appreciation for the course DOBP is marked with a 7.7. Students find the learning outcome relevant (9.0), the contents interesting (8.8) and appreciate the teacher to be available for questions (9.0). They are less satisfied with the quality of the study material (5.5). The aspects related to the exam are marked positively (all around 8.0).

These are the main conclusions of the evaluation. The interpretation is based on the remarks of the respondents. For an overview of the results, see the graph at the end of this report.

Recommendations by the committee:

It appears that the quality of the course can be improved. Therefore, the evaluation committee makes a recommendation:

- Improve the reader. Students complain about the quality of the reader. Its content is chaotic and it contains Dutch text which makes it difficult to read for foreign students.

Remarkable Facts:

- Very few students that fulfilled the evaluation used the open comments. This makes it difficult to make more recommendations.

Overview:

- Most marks are given on a scale from 1-5 and converted to a scale from 2-10 by multiplying with a factor 2. Therefore, a mark of 6.0 or higher is sufficient.
- The height of the bars in the graph represents the mark. The thin line at the top of the bars gives the standard deviation.
- Tempo of lecture grades: 2 is too fast, 6 is perfect, 10 is too slow.

Orange	General
Yellow	Lectures
Blue	Study material
Purple	Examination / Final Assignment

Marks	
Total appreciation	7.7
Ability to study	6.6
Relevancy	9
Quality of education	8.1
Coordination / planning	8.3
Examination / Assignments	8.1
