Sufficient Time

Sufficient Time

3x yes
-

Learning outcome relevant

Contents interesting

Adequate info on Teletop

Teacher available for questions

Prior knowledge insufficient

2x not agree
-
agree

Lecture tempo

Lecture tempo

too fast
2x yes
-

Lecture organization

Subject became clear

Use of facilities

Study material covered subject sufficiently

They didn't cover what was demanded from the student
--

Course suitable for self study

Quality study material

There were a lot of mistakes in the answer model, which was quite annoying.

Clear requirement for exam

Exam well related to major subjects

It was suggested the powerpoint slides would be enough to pass the exam. However, the exam was strongly related to the official book, which was too expensive (€200 firsthand) to purchase for a normal student.
--

Questions were clear

Remarks and suggestions

* There was too many information on the slides, and too less of that information was explained during the lectures.

* The lectures of Juan were clear, active and he explained the material with a lot of passion in contrast to the lectures of Sipke. These were too boring. They were too theoretical and very passive, so it was hard to keep attention. * About the examination, for a better understanding of the study material I would suggest to determine 50% of the final grade by several assignments (comparable to the excersizes of the book) and the other 50% by a final exam.

* The main lecturer of this course, Sipke Hoekstra has problems speaking understandable English and does not deliver the material with any enthusiasm. This makes the lectures very difficult to understand and follow.
