Course code: 195740120
 Contact: dr.ir. E.T.A. van der Weide
 Percentage of passed exams: 100%

The evaluation committee has evaluated the course Wind Energy by sending an online questionnaire to 28 students. 6 students filled in the questionnaire, which gives a response of 21%.

The overall appreciation of this course is marked with a 7.5, which is sufficient for a master course. The contents are considered relevant (9.3) and interesting (9.3). Most remarks are on the information density, which is very high. The lecturers did not have sufficient knowledge on the electric part of the wind turbines.

These are the main conclusions of the evaluation. The interpretation is based on the remarks of the respondents. For an overview of the results, see the graph at the end of this report.

Recommendations by the committee:

The quality of the course can be improved. Based on the results of the questionnaire, some recommendations for improvement are provided. The most important recommendations are:

- Find a third lecturer, who gives a lecture on the electrical part of the wind turbines. This lecture should not overlap Introduction to electrical power engineering

Overview:

- Most marks are given on a scale from 1-5 and converted to a scale from 2-10 by multiplying with a factor 2. For master courses, a mark of 7.0 or higher is sufficient.
- The height of the bars in the graph represents the mark. The thin line at the top of the bars gives the standard deviation.
