Please don't forget to send a .pdf of your MSc thesis report to boz-nano-ces@utwente.nl. All reports will be treated confidentially and are not available for third parties.

¹ BOZ-TNW will book a room, please indicate the expected number of people that will be present at the colloquium, and your preferred room (if applicable).

The master’s exam

Is your master assignment the last part of your master programme?

YES

NO

If yes, please note that in accordance with article 7.10, paragraph 2 of the WHW, the master’s final examination is deemed successfully completed if the exams of the units of study of the master’s degree programme have been taken successfully. As a rule, the date of the successfully completed exam of the last unit of study is taken as the date of the final examination (graduation date). If so desired (e.g. in case you want to take extra courses before graduating), the student has the right to submit a substantiated request in writing to the examination board to delay the graduation date and consequently the presentation of the certificate. In this request the student must at least indicate the desired duration of the delay. In case the student requests for a delay of the final examination, the new graduation date will be determined by the examination board. The student’s request should be submitted simultaneously with this form.

If no, please provide a list of the subjects that still need to be completed, with the expected date of finishing below.

List of subjects still to be done

Code	Name of subject	Expected date to finish this subject

Plagiarism check

All MSc thesis reports have to be checked for plagiarism. Please send a concept of your MSc thesis report to Cornelise Vreman (g.c.vreman-deolde@utwente.nl). She will do the check and if necessary discuss the outcome with you.

I already sent my concept MSc thesis report.

I will send my concept MSc thesis report within 1 one week after handing in this form.
